PROFESSIONAL SUMMARY

Motivated and adaptable Software Developer with hands-on experience building responsive, user-focused web applications. Skilled in developing efficient solutions, integrating systems, and improving application performance. Passionate about delivering impactful results while continuously learning and contributing to innovative, growth-oriented teams.

SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, React JS, PHP

Databases & Platforms: MySQL, Firebase, WordPress, CodeIgniter, Shopify (Basic)

Tools & Other: API Development, Capacitor, Git and GitHub, Bootstrap

EXPERIENCE

Software Developer | Idealocean Technologies, Satara

idealocean.tech/idealocean

Web Development Intern | Agrosan Adhar, Satara

Jan 2024 - Apr 2024

- Worked on the design, development, and optimization of web pages and web applications.
- Gained extensive hands-on experience with HTML, CSS, JavaScript, and APIs.
- Developed responsive and interactive user interfaces.

PROJECTS

AI-Based Learning Management System

- Developed a comprehensive student management system with AI-powered chatbot support for student interaction and doubt resolution.
- Implemented features for tracking student attendance and managing academic activities efficiently.
- Built a live classroom module enabling real-time interaction between students and teachers.
- Designed modules for managing exams, assignments, courses, notes, and video content.
- Enabled role-based access for admin, teachers, and students to streamline system operations.

Loyalty / Points Management System

- Developed a loyalty management system to handle customer registration, billing, and reward points.
- Implemented dynamic point allocation based on admin-defined slabs and purchase value.
- Built billing functionality integrated with automatic point calculation and updates.
- Designed modules for tracking point history and transaction history for each customer.
- Implemented automated notifications for birthdays, promotional offers, and expiring loyalty points, improving customer engagement.

Admin Dashboard with CRUD Operations (PHP & MySQL)

- Built an interactive admin dashboard using PHP with full CRUD operations for managing user data.
- Connected to a MySQL database to store and retrieve dynamic content.

E-commerce Management System

- Developed an e-commerce management system to handle product listings, pricing, and discounts.
- Built admin panel functionality to add, update, and manage products with images and details.
- Implemented dynamic pricing with discount management for better sales control.
- Designed backend system for efficient product data handling and storage.

KEY CONTRIBUTION

User Location Tracking Feature

- Implemented user location tracking using OpenStreetMap and geolocation functionality.
- Developed map-based visualization to display user location and movement.

EDUCATION
